## ABOUT US

Milho Vosloo Civil Construction is a civil construction firm based in the Eastern Cape, founded by Robert Vosloo, a registered professional construction manager at SACPCMP, qualified and seasoned Civil Engineer/Construction Manager with years of experience in diverse projects in South Africa.

Based on the diverse projects undertaken, Milho Vosloo Civil Construction is a full-service construction firm that can provide the materials, equipment, and skills for a vast variety of construction activities such as, specialized concrete works/repairs, excavations, roofing, waterproofing, carpentry, and other essential construction activities. Milho Vosloo Civil Construction has all the knowledge areas of project management by being a single full-service construction firm, able to streamline all physical construction scopes of work.

# KEY PEOPLE

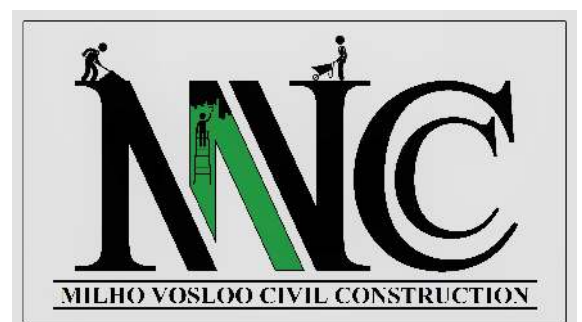

Base in Ugie, Eastern Cape, MVCC currently employs a staff complement of 27 dedicated professional and contract workers, that include office staff, foremen, contract workers. MVCC will execute several projects consecutively, and all projects will be led by Robert Vosloo.

Eng. Robert Vosloo, Director  
Beng (Civil), MScEng (Civil), PrCM (Reg Nr : C/1555/2020)

Milho Vosloo Civil Construction was founded by Robert Vosloo, a Civil Engineer, graduated from the University of Stellenbosch, at BEng in Civil Engineering, and MScEng in Civil Engineering – Construction Engineering and Management. Robert has over ten years of project management execution experience in the South African Construction Industry. As a Senior Engineer & Construction Manager during his career, he has played key roles in managing and executing projects worth over R2 Billion.

For eight and a half year he worked as a Senior Engineer & Construction Manager for Kusile Civil Works Joint Venture (KCWJV) at the Kusile Power Station. His role and responsibility, and scope of works covered the construction phase of all the civil works in the boiler house area. This created opportunity to effectively and efficiently liaise with several other multicultural contractors working in and around his workspace and still managing to achieve the milestones, whilst not delaying the follow-on contractors.

During 2020, together with his wife, Natasha Vosloo, they started their own construction firm MVCC to specialize in Concrete Works, Plant & Industrial Maintenance, and Housing Renovations.
